

VIVEK MISHRA

Full-Stack MERN Developer

Mumbai, India • +91 9930728882 • vivekmishra1209@gmail.com • [LinkedIn](#) • [GitHub](#) • [npm](#)

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 4+ years of experience building scalable, secure web applications across fintech, payments, healthcare, and CRM domains. Expertise in React.js, Redux, Node.js, Express, MySQL, and MongoDB, with hands-on payment gateway integrations (BillDesk, Razorpay), BBPS workflows, multi-role authentication, and real-time dashboards. Author of **react-bulk-excel-import**, an open-source npm library for bulk Excel/CSV imports in React.

TECHNICAL SKILLS

Languages JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend React.js, React Native, Angular, Redux (Thunk, Saga, Toolkit), Material UI, Tailwind CSS, Bootstrap

Backend & DB Node.js, Express.js, REST APIs, WebSockets, MySQL, MongoDB, Sequelize ORM

Payments BillDesk, Razorpay, BBPS Workflows, Webhooks

Tools & Concepts Git, Bitbucket, CI/CD, Docker, npm publishing, Scalable Architecture, Performance Optimization, Agile

PROFESSIONAL EXPERIENCE

Champion Software Technologies *MERN Stack Developer*

Aug 2025 - Present

- Building two production SaaS products end-to-end: a BBPS bill-payment platform and 360Pass, a multi-tenant society and gate-management system.
- Integrated BillDesk and Razorpay gateways with complete BBPS workflows — bill fetch, validation, payment, reconciliation — and fault-tolerant REST APIs with idempotent webhook handling.
- Built multi-role authentication and access control (Super Admin, Society Admin, Resident, Gatekeeper) with session-sync auto-logout on access revocation.
- Developed the 360Pass front-end in React/Redux using a scalable page-hook-store architecture and reusable component library; shipped a real-time gate-presence dashboard with live visitor tracking.
- Designed a bulk Excel import system (residents, flats) with validation preview and batched ingestion, published as the open-source npm library **react-bulk-excel-import**.

Adecco *Software Developer*

Aug 2024 - Mar 2025

- Built responsive, high-performance UIs for a financial web application (Mahindra Finance) using React, Vite, and Tailwind CSS; managed complex state with Redux Saga.
- Reduced initial load time through Vite-based code splitting, lazy loading, and bundle optimization.

Boldsoftmation LLP *Senior Frontend Developer*

Aug 2022 - May 2024

- Designed a multi-department CRM platform using React.js, Material UI, and Redux Thunk covering leads, invoices, follow-ups, and dispatch modules.
- Built reusable UI components and streamlined repetitive CRM operations into shared flows, improving team workflow efficiency.

Code B *Software Engineer*

Sep 2021 - Jun 2022

- Developed cross-platform React Native apps for healthcare and survey products (Mito Healthcare, Survey Magic); contributed to full-stack features with Node.js, Express, and MongoDB.

OPEN SOURCE & KEY PROJECTS

- react-bulk-excel-import (npm)** — TypeScript React library for one-line bulk Excel/CSV import: drag-and-drop modal, smart header matching, 3-layer validation with error preview, template download, batched API ingestion with progress, plus a headless hook. ESM + CJS with full types.
npmjs.com/package/react-bulk-excel-import | github.com/vivek1209-star-blog/react-bulk-excel-import
- 360Pass** — Multi-tenant society & gate-management SaaS with real-time gate presence and multi-role access control. (React, Redux, Node.js, Express, MySQL)
- BBPS Bill Payment Platform** — Bill-payment system with BillDesk & Razorpay integration and end-to-end BBPS workflows. (Node.js, Express, MySQL)

EDUCATION & CERTIFICATIONS

MCA — Thakur Institute of Management Studies, Career Development & Research

2021

BCA — Yashwantrao Chavan Maharashtra Open University (YCMOU)

2018

JavaScript (Basic & Intermediate) — HackerRank • React.js from Scratch — Udemy
